Emergency Management Planning and Administration

Emergency management is an umbrella term often used interchangeably with homeland security or disaster planning. Natural disasters, terrorist incidents and other devastating events prompt many local, state and federal agencies to revamp their administrative structures and response procedures as well as improve their communication plans. The demand for highly trained staff who may be called out in time of disasters has led to the quick expansion of this field in just a few years.

Career Opportunities

According to the Bureau of Labor Statistics, employment of professionals in emergency management related fields is projected to grow between six to 18 percent, depending on the employment sector and career path. Businesses and industries offer employment in emergency, disaster, or continuity of operations planning; risk management; or zoning departmental emergency planning.

Lakeland's Program

Lakeland's emergency management planning and administration program covers "all-hazards." These include natural, technological, and intentional acts. Students of the program will become skilled in reducing public vulnerability to disasters and other major events. The program is designed for both pre-service students and in-service practitioners. Students complete other courses such as English and social science at a college closer to home, and still earn an emergency management degree from Lakeland Community College or these courses may be completed online at Lakeland. Students may also have the option of the certificate format. Lakeland was the first college in Ohio to offer an associate degree program, as well as a certificate program, in emergency management planning and administration.

The Lakeland Advantage

- Lakeland's program is the only International Fire Service Accreditation Congress accredited associate degree in Emergency management planning and administration in the country.
- The program is endorsed by the FEMA Higher Education Project, the Ohio Emergency Management Agency, Lake County Emergency Management Agency, Ashtabula County EMA, Geauga County Department of Emergency Services, and the Greater Cleveland Chapter of the American Red Cross.
- Degree available online.
- Students can remain on campus to pursue a Bachelor's degree through the Holden University Center with Cleveland State University's Bachelor of Arts in Public Safety Management program.

Lakeland Community College Admission Requirements

For admission into Lakeland, students must be a high school graduate or have obtained a high school diploma equivalency. Please consult Lakeland Community College's Enrollment Guide (available on Lakeland's website at lakelandcc.edu/enrollment) for specific admissions requirements and procedures.

Emergency Management Planning and Administration (9670)

Associate of Applied Science Degree

The magnitude of natural disasters, terrorist incidents, and other major emergencies has increased the public awareness of the importance of effective emergency management. Rapid growth and complexity in this field have created a critical need for a new degree option for those involved in this important career area.

The Emergency Management Planning and Administration program is a comprehensive all-hazards program with a goal of reducing the public vulnerability to disasters and other major events. The program is designed to address the four major umbrella areas of emergency management, which are mitigation, preparation, response, and recovery.

All core emergency management courses are scheduled for online delivery, which is available 24 hours a day, 7 days a week. Students living a distance from Lakeland may take the emergency management courses online, complete other courses such as English and social science at a college closer to home, and still receive their Emergency Management degree from Lakeland Community College.

The intended audience for the core/major courses includes the following:

- County and state emergency management agency administrators and their staff
- State, county, and local administrators with emergency planning responsibilities
- American Red Cross and other community agency administrators, staff, and volunteers
- Emergency management personnel employed in business, industry, and public utilities
- Building, planning, engineering, zoning, and floodplain management professionals
- Environmental and public health officials and their staff
- Transportation department and public works personnel
- Active and reserve military personnel involved in emergency management
- Other public safety personnel with emergency management planning responsibilities
- Environmental, natural resources, and forestry professionals
- Risk management professionals and healthcare professionals with emergency management responsibilities.
- Pre-service students who aspire to become an emergency management professional.

The Emergency Management degree (aka Homeland Security or Disaster Planning at many colleges) is internationally accredited by the International Fire Service Accreditation Congress (IFSAC).

For details call the program director at 440.525.7252.

A certificate is also available.

NOTE: Many Emergency Management (EMGT) courses are scheduled on an alternating basis, therefore, not all EMGT courses are offered every academic year. Contact the Counseling Office or program director for scheduling details and advice.

Distance learning students should consult an academic counselor regarding possible course substitutions for CHEM 1050 Chemistry in the Everyday World and PHOT 1100 Basic Photography/PHOT 1105 Basic Photography - Digital.

NOTE: Students planning to transfer to a four-year college are encouraged to take ENGL 1120 English Composition II in addition to or as part of the following requirements.
