APA 7th Edition In-Text Citations and Other Helpful Information

Basic Format for in-text citation (Author, year, page) — (Smith, 2015, p. 25).

Page number required for direct quotes only. If no page number exists, use paragraph #, section header, or both.
e.g., (Smith, 2017, para. 3) (Smith, 2017, Methods section) (Smith, 2017, Methods section, para. 3).

Basic Format for Signal Phrase According to Smith (2014), "Lakeland is a wonderful college" (p. 25).

Block indent quotations of forty or more words. If source has **no date**, use “n.d.”

Multiple Works in One Citation Separate sources with a semi-colon → (Cy & Jones, 2007; White et al., 2013).

Secondary Source (Source referenced within another source) e.g., → Jones' (1999) study proved that frequent changing of patient positioning reduced pressure ulcers (as cited in Smith, 2014, p. 16).

Note: Name original author (Jones) in your paper and include the secondary source (Smith – the one you read) in the citation and reference page.

Tricky APA rules: 1) Use "and" in your paper but use "&" sign in references and citations. 2) Most titles are lowercased (articles & books) but do capitalize and italicize journal names. 3) Use past tense signal phrases (e.g., "The author noted, stated, wrote...")
