DISCOVERING THE WORLD THROUGH GIS

GIS day

Nov. 16, 2022
9 a.m. -2 p.m.
Lakeland Community College
HIVE, H-Building

Geographic Information Systems (GIS) includes the mapping technologies that are used to capture, analyze and display information in order to better understand our world.

DID YOU KNOW? GIS technology is used for: business, city planning, education, real estate surveying – and much more!

Exhibitors:

American Society for Photogrammetry and Remote Sensing (ASPRS), CT Consultants, Geauga County Planning Commission, Global Marketing Insights, Inc., Kaizen Village Foundation, Kucera International, Lake County General Health District, Lake County GIS Department, Lake County Planning Commission, Lake County Soil and Water Conservation District, Lakeland Community College, Northeast Ohio Regional Sewer District and Preformed Line Products.

Speakers:

Downstairs, Rooms H-005/008
9:30 a.m.	Geointelligence
10:30 a.m.	Cultural Resources Predictive Models
11:30 a.m.	"Using drone remote sensing to identify invasive plants in aquatic and wetland ecosystems"
12:15 p.m.	Open Source Data
1 p.m.	GIS Nuts and Bolts

Upstairs, Room H-116
10 a.m.	Moses Trees
11a.m.	Effects of Human Activity on Land
11:45 a.m.	American Society for Photogrammetry and Remote Sensing
12:30 p.m.	The Why of Where: Spatial Thinking, Geography, and GIS
1:30 p.m.	Historical Maps

FREE and open to the public.

Find out how to pursue a degree or certificate in geospatial technology at Lakeland!
